## **GRANITE CONSTRUCTION COMPANY HOSTS COMMUNITY OPEN HOUSE AT ROSEMARY'S MOUNTAIN QUARRY**

**Fallbrook, CA (October 26, 2010)** – Gary Nolan, Granite Construction Company Plant Construction Manager, and Company Officials welcomed members of the greater Fallbrook community to an Open House at Rosemary's Mountain Quarry (RMQ) this past Saturday, October 23.

RMQ is located approximately 1 ½ miles east of Interstate 15 on State Route 76. The site is a 92-acre sand and gravel mining operation that is in the early stages of development. The site currently produces and sells aggregate products including rip-rap for erosion control and will soon be marketing Hot Mix Asphalt to all interested customers.

The Granite Construction team welcomed 100 visitors to the site by offering site tours as well as in depth descriptions of the operations at the mining site. Visitors were treated to an explanation of the process that tracks the cycle of sand and rock as it winds through various stages to ultimately leave the gates as aggregate construction material.

Activities for the children included a bounce house as well as bean bag tosses and games to keep everyone entertained. All visitors were treated to a Bar-b-q lunch to top off the festivities.

Special guests for the event included Tom Rogers, Legislative Director for California State Senator Dennis Hollingsworth (R-36<sup>th</sup> District) and San Diego County Supervisor Bill Horn. Tom Rogers presented Granite Construction Company with a resolution that there is a need to locate additional aggregate sources near major transportation corridors which will benefit communities by reducing truck miles, reducing emissions, improving traffic congestion, create jobs, and supply much needed aggregate.

*Granite Construction Incorporated is a member of the S&P 400 Midcap Index, the FTSE KLD 400 Social Index and the Russell 2000 Index.
