Re: Will Serve Letter
Liberty Quarry
Area: Temecula, California

Thank you for inquiring about the availability of natural gas for your project. We are pleased to inform you that Southern California Gas Company has facilities in the area where the above-named project is proposed. Gas service to the project could be provided from the nearest existing **4" main located at the intersection of Pala Road and Rainbow Canyon Road**. The service would be in accordance with the Company's policies and extension rules on file with the California Public Utilities Commission at the time contractual arrangements are made.

This letter is not a contractual commitment to serve the proposed project, but is only provided as an informational service. The availability of natural gas service is based upon conditions of gas supply and regulatory agencies. As a public utility, Southern California Gas Company is under the jurisdiction of the California Public Utilities Commission. Our ability to serve can also be affected by actions of federal regulatory agencies. Should these agencies take any action, which affects gas supply, or the conditions under which service is available, gas service will be provided in accordance with revised conditions. This letter is also provided without considering any conditions or non-utility laws and regulations (such as environmental regulations) which could affect actual construction of a main or service line extension (for example, if hazardous wastes were encountered in the process of installing the line). Those, of course, can only be determined around the time contractual arrangements are made and construction is begun.

If you need assistance choosing the appropriate gas equipment for your project, or would like to discuss the most effective applications of energy efficiency techniques, please contact your area Project Manager at (909) 335-7656.

Thank you again for choosing clean, reliable, and safe natural gas, your best energy value.

Sincerely,

Mike Fern
Technical Services Supervisor
