## Don't listen to scare tactics

What are the opponents of Liberty Quarry thinking? We need jobs right now and to get jobs, we need concrete and other building materials. How does Temecula think it gets the tons of concrete for the new City Hall, new water park or materials for new roads?

The ones who oppose Liberty Quarry are the same types who are running businesses and jobs out of California, while those of us who choose to stay lose our jobs and the cost of building roads and everything else rises beyond our ability to pay.

If you buy the many claims of the opposition, many of whom are the same groups that say no to everything we do, please investigate by contacting Liberty Quarry as I did. I don't buy the unsubstantiated scare tactics of a very loud minority anymore — how about you?

Lynne Rogers

Winchester

Way to go 'of this world'. No knowledge, no logic, no argument - call someone a bad name. This is known as 'liberal logic'!

Yes that's right Lynne Rogers, a few truck driver jobs are really going to help the economy. While you're sitting on your obese behind in Winchester, kids will be breathing cancer-causing silica dust in south Temecula. You're a despicable human being.

I don't care one way or another, but I always find the overplayed Chicken Littel card that Temecula NIMBYs are infamous for as facinating. So Gunner, if there are 7 others in the county, where are all the stories of those afflicted with respiratory disease, fouled air and other environmental catasrophies, and mile after mile of gravel trucks clogging the roads?

5. [gunner](#) said on: January 23, 2010, 1:23 pm

To Lynne Rogers,just as we have plenty of supermarkets, we also have plenty of quarries. Did Granite tell you that there are at least nine other quarries in R/Side county, and Granite have opened one just seven miles down the road, on Hwy;76 so don't be bamboozled by Granite's deceptive talk.

It worries me that I would agree with someone displaying a gun over our flag. But in this case I do agree. We need to bring jobs home. There can not be a jobless recovery.

Lynne Rogers has got it right by being skeptical of those who pretend they are protectors of the environment. Industry made this country great and the environmental pretenders have done much to destroy it. While the rest of the world is going and growing, the environmental morons are making the US the laughingstock.
